

## Final Presentation Night Preparation

Weekly Report 26- 3/25 to 3/31

This week has primarily been focused on preparing for final presentation night. This week invitations were made and a room for final presentation night was found. In addition, a mentor visit with Morgan Crowder took place.

The most important part of this week was preparing for final presentation night. This week the final presentation invites and guest list were created. For the invites, the color scheme was made to match the color scheme for my presentation and display board. For the guest list, it is required to have at least ten people in the audience, this meant inviting about 30 people in order to ensure that the minimum requirement is met. In addition to creating invites, a teacher that was willing to allow their room to be borrowed for the presentation was found. These preparations will be very helpful for the future presentation. While preparing for the presentation, progress was also made on the final product. The mentor visit this week was also very interesting as Mrs. Crowder explained how to use Revit, an architectural computer program.

Overall this week has been very important in making preparations for final presentation night. In the upcoming week, focus will be put on updating portfolios, maintaining mentor visits, and continuing to work on the final product.
